## Massive Storage Capacity and Windows Operating System for Small and Medium Businesses

Buffalo Technology's TeraStation™ with Windows Storage Server 2012 R2 (WS5400DWR2) combines four hard drive, high-performance network attached storage with the power and convenience of Windows operating system.

The WS5400D seamlessly melds with networks' existing Windows computers and server enabling quick straightforward deployment and massive storage capacity available in an instant.

The Buffalo quality you know and trust, plus the power of Windows, gives WS5400D users flexible and fully customisable business-critical support.

Once deployed, users will find WS5400D enables full Active Directory integration facilitating comprehensive access management, policies, and security. This allows networks to automate access and manage storage in the same way as they do their Windows Server. PowerShell and Microsoft Systems Center are ready-to-use, as well as a flexible choice of storage protocols (iSCSI, CIFS/SMB, NFS). Your most demanding applications and processes, such as replication, SQL, a fast-indexing search during an anti virus scan, and more, are no problem for the WS5400D.

The WS5400D comes equipped with the powerful Intel® Atom™ Dual-Core D2550 Processor and 4GB of fast DDR3 memory installed. Buffalo Technology's TeraStation™ WS5400D is designed to guard against failures and prevent downtime with four hot-swappable drives.

Available fully populated with 4, 8, or 12TB capacity.
